

QSIGN

Certificate of Quantum-Certified Notarization

Verification: AUTHENTIC

Document

Document hash (SHA-256) bce77470fdf4bfbfca1c089fed4e90a63e1d4f90237db9791734f4e87405a7af

Timestamp (UTC) 2026-07-30T20:56:42Z

Quantum proof of origin (Bell-CHSH)

CHSH value 2.8125 (classical bound 2.0 · Tsirelson 2.8284)

Bell inequality violated Yes

Quantum backend AerSimulator

Shots 8192

Document-bound circuit Yes — angles derived from document hash

Cryptographic seal

Signature scheme ML-DSA-65

Post-quantum Yes (NIST FIPS 204)

Issuer (QSIGN authority) 0dbf90dab86aacfe

Verification checks

- PASS Document fingerprint
- PASS Quantum origin (CHSH > 2.0)
- PASS Document-bound circuit
- PASS Post-quantum signature
- PASS Trusted issuer

Scan to verify. The code carries the document hash, CHSH value, issuer fingerprint, signature scheme and timestamp, plus the QSIGN verifier URL.

QSIGN certifies the integrity and quantum origin of the document identified above. It attests to the file's authenticity and its issuing authority — not to the truth of the document's contents. Verify at any time by presenting the original file and its JSON certificate to the QSIGN verifier.
